## Upgraded points on Rev.11

---

### \* Upgraded points

- CAN module added on the board (Possible to change mode with Menu button of the car, when to press the Menu button shortly, the mode changes to Main screen and for 1~2 sec, the video mode changes.)

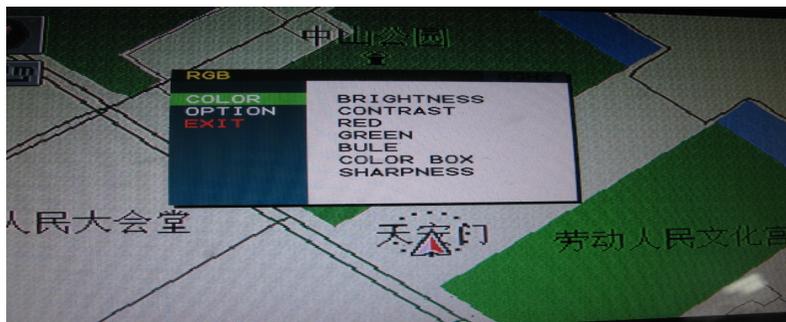

Toggle S/W is not offered due to CAN module added (Option)

- Possible to make a remote button of DVD or Navi that User appoints mode change button.  
You can save remote values (maximum 3 buttons) of DVD or Navi to the Interface.  
(Refer to Next page to know how to do.)
- Audio Select function is added.
- Possible to save OSD setting value by each video mode.

## The use of remote key scanning

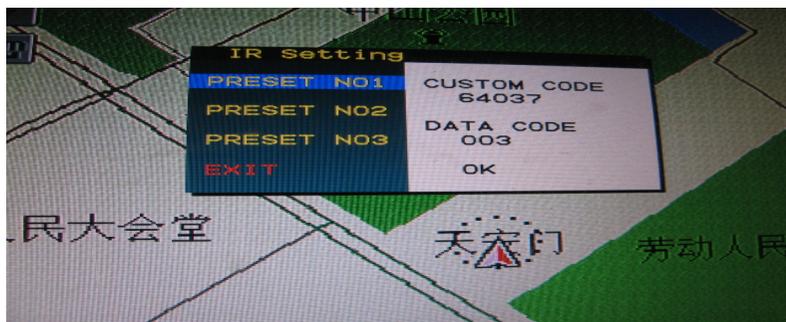

①

When to press Menu button of remote offered, Menu is displayed on the screen like picture No.1. and press 4291 buttons sequently then, it changes to IR scan mode.

②

When IR Setting mode is displayed like picture No.2, choose one of Preset No.1~3 and press ok button on the remote.

③

After step No.2, press one button of Navi or DVD remote, then the screen shows the key value and it's saved. Then, you exit IR setting and you can use it right away.

\* This function can be applied to almost all of remotes using NEC format.

## Pre-Caution
